GREENGUARD® GOLD CERTIFIED

Sunbrella upholstery fabric has achieved Greenguard Gold Certification for contributing to healthy indoor air as a product with low chemical and particle emissions.

SKIN PROTECTION

The Skin Cancer Foundation recommends Sunbrella® fabrics* in shading products as an aid in the prevention of sun-induced damage to the skin as part of a complete sun protection regimen, including regular use of sunscreen.

* Does not apply to Sunbrella Shadow

ZERO LANDFILL

Through careful materials selection in all processes and extensive recycling programs, nothing from any Sunbrella manufacturing facility worldwide is sent to a landfill.

SOLAR POWER

In 2011, we installed solar arrays for Sunbrella manufacturing facilities that generated enough energy to power 47 homes and, combined with an upgrade of all light fixtures, reduced annual CO2 emissions by 1,000 tons. In 2016, the solar capacity across facilities was tripled with a total capacity of more than 1,500 kilowatts.

RECYCLE SUNBRELLA

Help us remain sustainable. Sunbrella provides a unique way for you to recycle Sunbrella fabrics through a revolutionary take-back program, "Recycle My Sunbrella." Learn more at www.recyclemysunbrella.com.

LESS WASTE

Because Sunbrella fabrics last much longer than traditional fabrics, they ultimately create less waste than fabrics that need to be replaced more often due to fading or loss of strength.

WASTEWATER REDUCTION

Our unique coloring process makes Sunbrella fabrics fade-resistant and conserves more water than conventional dyeing processes.

WILDLIFE CONSERVATION

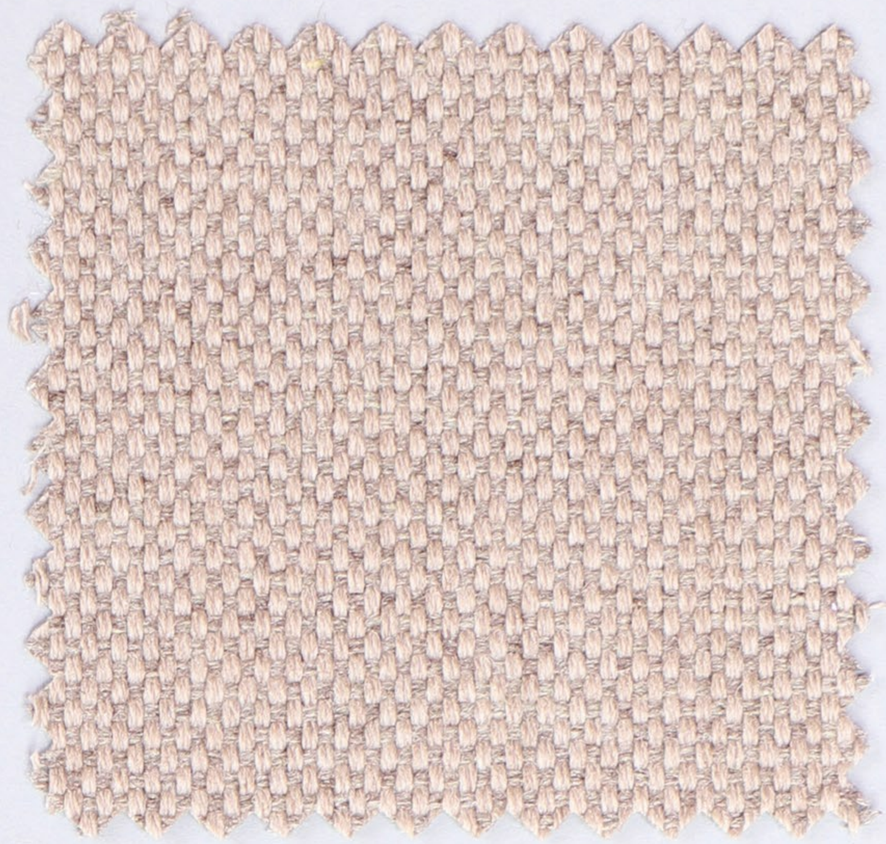

We work to preserve the environment around our facilities, conserving the plant and animal life that is native to the area.
